ANALYTICS

CASE PROFILE

This brick and mortar business, specializes in children's gymnastics, offering training, classes, and retail gym related items. We began the SEO process with a robust keyword portfolio and page mapping to help the content convey the correct messaging. From there we started the on-page optimization using data from our deep website audit to produce a strategy relying on local signals from directories, addressed page speed issues, and shored up redirects. The business is now seeing double the numbers from just a few months ago.
